

INDUSTRY LEADERS IN PLAQUES

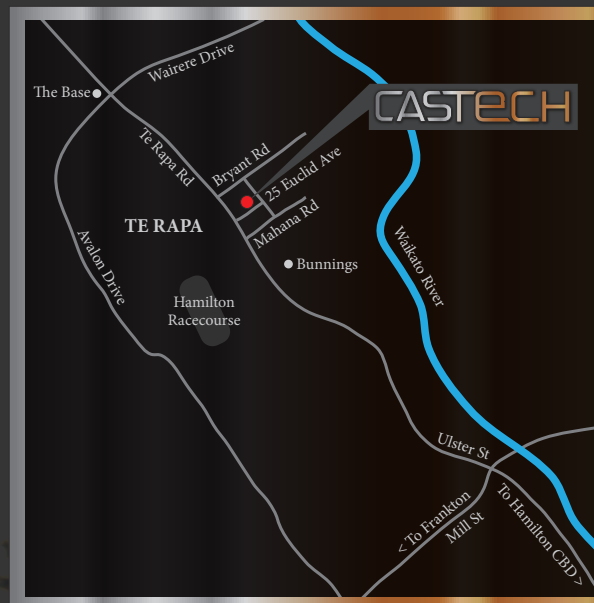

Castech has manufactured bronze plaques for over 20 years and has gained a reputation for high quality. Castech combines modern technology of computer generated typesetting, graphic designs, polymer pattern production, with traditional sand casting and finishing techniques.

WHY CHOOSE BRONZE?

Bronze is a copper based alloy and is an extremely long lasting and durable material. Many bronze statues around the world have lasted hundreds of years. Raised lettering means it can always be read even after many years. Lichen and fungus does not grow on bronze plaques compared with granite or marble.

Create a lasting impression with a plaque crafted by Castech...

BRONZE MEMORIAL PLAQUES

A wide range of border options and styles are available, along with an extensive range of embellishments or custom designs if required.

All plaques are hand fettled and finished with traditional dark bronze patina background. The plaque then has a baked clear coat to provide long lasting finish.

Alternatively plaques can have a painted background to a specific colour or can be chrome plated.

OPEN BOOK - with changeable pages

A beautifully crafted embossed open book design that has replaceable pages fitted to a base frame. This allows for either page to be replaced at any time if an additional inscription is required. It also can be supplied with one full page.

A single inscription with an embellishment >

Right page replaced to create a double inscription

Plaques can be made to any shape and size, to comply with any local cemetery requirements that may apply. A free inscription lay-up service is offered for all memorial plaques.
